The year is 1908 and thanks to the invention and development of the steam engine, the Great British Empire has never been more prosperous. Countless people arrive in London, the center of the world, hoping to find a living, including our protagonist, Roger. This attempt at becoming a detective has led him into a vortex of mysteries, surrounding murder, money, power, and love.

## Challenge

Challenging mini-puzzles and NPCs hiding their true intentions, players must use logic to combine clues and elements together to create a full picture of the actual story.
